DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In the abstract, Line 8, "said back unit register" has been changed to --the back unit register--.

The application has been amended as follows: In the abstract, Line 12, "said front unit register" has been changed to --the front unit register--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art teaches the use of image sensors with shift registers having reset circuits. However, the prior art does not teach the use of image sensors having a first reset circuit having a first transistor which is on when the output signal of the unit register is at a high level, and drives an input signal line of the back unit register to a low level via the first transistor and each second reset circuit includes a second transistor which is on when an output signal of the corresponding unit register is at a high level, and drives an input signal line of the front unit register to the low level via the second transistor. For this reason the claims are allowed over the prior art. Furthermore, the prior art does not teach the method of a first reset step of resetting an input signal of a back unit register which is in back in shift direction of the unit register which has output a high level signal by shifting one stage and a second reset step of resetting an input signal of a front unit register

arranged in front of in shift direction of the unit register which outputs a high level signal by shifting one stage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
